

**Do you suffer from...
Burning pain? Restless
Legs? Tingling?
Numbness?
Chronic Pain?**

Relief IS possible.

The Unfortunate Reality

More than 20 million Americans suffer from chronic pain. Just as people near their "Golden Years" when when they can relax and enjoy life, their pain related to diabetes, arthritis, and other ailments can dampen their joy. The good news is that relief IS possible.

Here at Atlanta Neuropathy Clinic, our goal is to help you achieve a pain-free state so that you can once again enjoy life to the fullest. We provide effective relief for our patients through Combined Electrochemical Treatment (CET).

Results of CET Peer-reviewed studies have shown improvements in 75-85% of patients in...

- pain levels
- numbness/tingling levels
- sleep quality and quantity
- range of motion
- mobility
- endurance
- functional improvement
- quality of life

Combined Electrochemical Treatment (CET) works by re-tuning the electric cell signals in your body so that communication between your cells is restored and optimized. It's based on the physics of resonance, similar to when a piano is tuned. The tuner strikes the piano string to adjust the energy that vibrates along it to create sound. Adjusting the string creates the ideal pitch or tone for the piano. Similarly, when CET signals are optimized and correctly "tuned" intercellular communication is normalized. Your cells are able to successfully transfer energy that's used to heal injured tissues and relieve pain.

Please give us a call for a free consultation and come see us. We are located at 1872 Independence Square, Suite A, Dunwoody, GA 30338. Our clinic and office are clean and comfortable.
